FULLSTACK DEVELOPER

Software engineering student specializing in the TypeScript/JavaScript stack, including Node.js, React, and PostgreSQL. Skilled in building scalable and maintainable web applications. Proactive problem-solver with strong collaboration and communication skills, committed to delivering impactful solutions and driving innovation.

WORK EXPERIENCE

DynaGroup - Cap. Gral. Ramón Freire 4801, Bs As

07/2024 - PRESENT

FullStack Developer

- Designed and developed robust back-end systems, including functional databases, APIs, and servers, improving reliability and scalability for web platforms.
- Migrated a legacy application from vanilla JavaScript to React, improving usability with features like keyboard shortcuts and optimizing user workflows.
- Collaborated with cross-functional teams to identify and address technical challenges, delivering solutions on time and within project scope.

Serfe - Falucho 2032, Santa Fe

06/2024 - 09/2024

Full Stack Developer Intern

- Developed backend with PHP and migrated frontend from jQuery to React.
- Gained full-stack experience in a web development project for a U.S. company during an internship.

EDUCATION

Universidad de Palermo - Mario Bravo 1050, Bs As

Bachelor of Science - Software Engineering, May 2024

DigitalHouse - Av. Monroe 860, Bs As
