FULL-STACK DEVELOPER

Software engineering student specializing in the TypeScript/JavaScript stack, including Node.js, React, and PostgreSQL. Skilled in building scalable and maintainable web applications. A proactive problem-solver with strong collaboration and communication skills, dedicated to delivering effective solutions and fostering innovation in fullstack development.

WORK EXPERIENCE

DynaGroup - *Cap. Gral. Ramón Freire 4801, Bs As*   07/2024 - PRESENT

FullStack Developer
- Designed and developed robust back-end systems, including functional databases, APIs, and servers, improving reliability and scalability for web platforms.
- Migrated a legacy JavaScript application to React, enhancing usability with features like keyboard shortcuts and streamlined workflows.
- Worked with cross-functional teams to resolve technical challenges and ensure timely project delivery.

Serfe - *Falucho 2032, Santa Fe*   06/2022 - 09/2022

Full Stack Developer Intern
- Developed backend with PHP and migrated frontend from jQuery to React.
- Acquired hands-on full-stack experience while developing a web project for a U.S. client during an internship.

EDUCATION

Universidad de Palermo - *Mario Bravo 1050, Bs As*
Bachelor of Science **-** Software Engineering, May 2024

DigitalHouse - *Av. Monroe 860, Bs As*
Full Stack Web Development, 10/2021 - 04/2022
Completed an intensive program covering front-end and back-end web development.
